TECHNICAL SKILLS

Platform – ServiceNow (Certified ServiceNow Administrator)
Scripting Languages – JavaScript (ServiceNow scripting), Glide scripting
Web technologies – HTML, CSS, ServiceNow UI development
ServiceNow modules – ITSM, Integrations, CMDB, CSM, HRSD, Service Portal, ITOM, App Engine Studio, UI Builder, Virtual Agent, Agentic AI, GEN AI, Now Assist and Custom & Scoped Applications.
ServiceNow ITSM modules – Incident, Problem, Change, Service Catalogue, Knowledge, Service Portal, Event Management, Service Mapping, CMDB, Workflows, Flow Designer and Administration.
Service Portal – Development, customization, and UI/UX enhancements
Integrations – REST APIs (Postman), SOAP APIs, Confluent Kafka, Jira, and LDAP/Active Directory
Other - Update Sets, Transform Maps, Email Notifications, Domain Separation, Performance Analytics, Reporting, and Dashboards
Methodologies - Agile (Scrum), Waterfall

CERTIFICATIONS

Certified System Administrator (**CSA**)
Certified Application Developer (**CAD**)
Micro-Certification - **CMDB** Health
Service Now Micro-Certifications in **Flow Designer**
Agentic AI Executive Micro-Certification

PROJECT HIGHLIGHTS

- Developed and customized Scoped Applications using App Engine Studio, Flow Designer, Business Rules,

Results-driven **ServiceNow Developer** with **3+ years** of IT experience specializing in ServiceNow development, platform administration, and enterprise integrations.
Hands-on expertise in ITSM modules including Incident, Problem, Change, Knowledge Management, Service Catalog, and SLA management, aligned with ITIL best practices.
Proficient in ServiceNow development using Flow Designer, Workflows, Business Rules, Client Scripts, UI Policies, UI Actions, and Glide scripting to automate and optimize business processes.
Strong experience in REST and SOAP API integrations with enterprise systems such as Jira, Salesforce, Microsoft Teams, BMC, and Kafka, enabling seamless cross-platform automation.
Experienced in Service Portal development, building custom widgets using JavaScript, HTML, and CSS, and designing responsive self-service solutions to enhance user experience.
Working knowledge of CMDB administration, CI relationships, HRSD, CSM, ITOM, App Engine Studio, Virtual Agent, Now Assist, GEN AI and UI Builder. supporting configuration, case management, and low-code application development.
Skilled in catalog item development, record producers, order guides, ACL security, data imports, transform maps, reports, dashboards, and email notifications.
Experienced in Agile/Scrum delivery environments, collaborating with business and technical teams to deliver scalable ServiceNow solutions for enterprise IT operations.
Proven ability to improve service efficiency, automate workflows, and enhance user productivity through effective platform customization and integration.

EXPERIENCE

August 2023 - Current
ServiceNow Developer ***IBM (Payroll: COMPUSYS SYSTEMS PRIVATE LIMITED)***, Bengaluru, India
Project: 1 HR Service Delivery Implementation and Automation - HRSD.
Description: Implemented and configured ServiceNow HR Service Delivery (HRSD) solutions including HR Case Management, Employee Service Center, HR Catalog Items, Case Workflows, Assignment Rules, and Lifecycle Event Automation. Developed Business Rules, Client Scripts, UI Policies, Script Includes, dashboards, reports, import sets, and bulk data operations to streamline HR operations and improve service delivery efficiency.

- Implemented and configured HR Service Delivery (HRSD), including Case Management and Employee Service Portal.
- Designed and developed the HR Service Catalogue and HR Catalogue Items for employee lifecycle processes.
- Configured HR case workflows, case templates, assignment rules, and transfer cases for efficient HR operations.
- Developed business rules, client scripts, UI policies, and script includes specific to HR case automation.

Client Scripts, UI Policies, Script Includes, and ACLs.
- Implemented ServiceNow ITOM solutions including Discovery, Service Mapping, Event Management, MID Server Configuration, and infrastructure visibility automation.
- Managed and enhanced CMDB through CI lifecycle management, relationship mapping, CMDB Health remediation, and Discovery integrations
- Configured and supported Customer Service Management (CSM) including Case Management, Entitlements, SLAs, Workspaces, Knowledge Management, and Customer Portals.
- Implemented HR Service Delivery (HRSD) solutions including HR Case Management, Employee Center, HR Catalog Items, Lifecycle Events, and HR Workflows.
- Developed and customized Service Portal pages, widgets, catalog experiences, knowledge integrations, and self-service solutions using JavaScript, HTML, CSS, and AngularJS.
- Built conversational solutions using Virtual Agent, Topic Flows, NLU, Catalog Integrations, Knowledge Search, and Employee Self-Service automation.
- Configured and utilized Now Assist capabilities for case summarization, knowledge generation, virtual agent enhancements, and agent productivity improvements.
- Worked with Agentic AI use cases leveraging AI-powered workflow automation, intelligent task orchestration, and operational assistance within ServiceNow.
- Developed modern user experiences using UI Builder, Workspaces, Next Experience UI, Data Resources, Client State Parameters, and Declarative Actions.
- Designed and implemented REST API, SOAP API, Integration Hub, Flow Designer Spokes, and third-party integrations with enterprise applications.
- Created Reports, Dashboards, Performance Analytics, Notifications, and Workflow Automations while following ITIL best practices, SDLC, Agile, and ServiceNow development standards.
- Created Reports, Dashboards, Performance Analytics, Notifications,
- Created and managed HR dashboards and reports for tracking HR case performance and KPIs.
- Executed bulk case creation, HR skill management, and data load using import sets for large-scale HR operations.

Technologies Used: ServiceNow HRSD, HR Case Management, Employee Service Center, HR Service Catalog, Flow Designer, Business Rules, Client Scripts, UI Policies, Script Includes, Import Sets, Transform Maps, Reports, Dashboards, SLA, Glide Record, JavaScript, Service Portal.

Project: 2 Enterprise IT Operations Management (ITOM) Implementation.

Description: Implemented and supported ServiceNow ITOM solutions including Discovery, Service Mapping, CMDB, Event Management, MID Server administration, and cloud infrastructure visibility to improve operational monitoring and service reliability.

- Implemented ServiceNow Discovery, MID Servers, and Credential Management for automated CI population in CMDB.
- Configured Service Mapping, Application Services, and Dependency Mapping for impact analysis and service visibility.
- Managed CMDB, CI Relationships, CMDB Health, and CI Lifecycle Management to improve data quality.
- Configured Event Management, Alert Correlation, and Event Rules to reduce alert noise and improve monitoring.
- Integrated AWS and Azure Cloud Discovery for centralized infrastructure visibility and asset tracking.
- Developed automation using Flow Designer, Business Rules, Integration Hub, and REST/SOAP Integrations.
- Created Reports, Dashboards, and Performance Analytics to monitor CMDB compliance, discovery coverage, and service health.

Technologies Used: ServiceNow ITOM, Discovery, Service Mapping, CMDB, CMDB Health, Event Management, MID Server, Cloud Discovery, AWS, Azure, ITOM Visibility, Flow Designer, Integration Hub, Business Rules, REST API, SOAP API, JavaScript, Glide Record, Reports, Dashboards, Performance Analytics, ITIL.

Project 3: Employee Onboarding Application-ITSM

Description: Designed and implemented an Employee Onboarding Application in ServiceNow using Service Catalogue, Flow Designer, Business Rules, and Glide Scripting to automate HR, IT, and Facilities provisioning workflows. Integrated external systems through REST APIs, configured SLAs, notifications, dashboards, and reporting, reducing onboarding turnaround time by 30% and improving operational efficiency.

- Designed and implemented an Employee Onboarding solution using ServiceNow Service Catalogue and Flow Designer, enabling managers to submit onboarding requests and automating provisioning activities across HR, IT, and Facilities teams.
- Developed dynamic catalogue items, record producers, and conditional forms to capture onboarding details and trigger automated task generation using Business Rules and Glide scripting, streamlining onboarding process.
- Configured SLAs, email notifications, and workflow automation to track onboarding tasks, ensuring timely completion of access provisioning, equipment allocation, and workspace setup.
- Built reports and performance analytics dashboards to monitor SLA compliance, onboarding progress, and operational performance.
- Integrated ServiceNow with external systems using REST APIs to enable seamless data exchange and enterprise automation.
- Achieved a 30% reduction in onboarding time, a 25% reduction in manual HR effort, and improved the overall employee onboarding experience.

and Workflow Automations
- Developed AI-powered workflows using Now Assist, Agentic AI, AI Agent Studio, Virtual Agent, Flow Designer, Integration Hub and UI Builder to automate service operations and enhance user experience.

- Performed data migration using Import Sets and Transform Maps, and handled Update Set deployments across instances.
- Built custom reports and dashboards, configured email notifications, and participated in Agile (Scrum) delivery cycles.

Technologies Used: ServiceNow, ITSM, Service Catalog, Flow Designer, Glide Scripting, REST APIs, and Performance Analytics**.**

Project: 4 Enterprise Self-Service Portal Modernization

Description: Designed and developed scalable ServiceNow Service Portal solutions by creating custom widgets, responsive interfaces, and self-service applications. Enhanced user experience through portal customization, workflow integrations, access controls, and performance optimization while supporting enterprise service management initiatives.

- Developed and customized ServiceNow Service Portal pages, widgets, themes, portals, and layouts to deliver responsive, user-friendly self-service experiences across enterprise environments.
- Designed and enhanced custom widgets using AngularJS, HTML, CSS, JavaScript, and Server Scripts, improving portal functionality, usability, and performance.
- Integrated Catalog Items, Record Producers, Knowledge Base articles, and Service Catalog workflows within Service Portal to streamline request submission and service fulfillment processes.
- Implemented client-side scripting, widget scripting, role-based access controls (ACLs), and portal security configurations to ensure secure and seamless user access.
- Optimized portal performance through widget customization, troubleshooting, debugging, and issue resolution, enhancing system stability and user satisfaction.
- Collaborated with cross-functional teams to develop and support multi-portal solutions, employee self-service, IT self-service, and enterprise service management initiatives aligned with business requirements.

Technologies Used: ServiceNow Service Portal, AngularJS, JavaScript, HTML, CSS, Bootstrap, Widget Development, Service Catalog, Record Producers, Knowledge Base, Employee Center, Client Scripts, Server Scripts, ACL, RBAC, Portal Security, Responsive Design, Workflow Automation, REST API Integration, Portal Performance Tuning, Debugging, Enterprise Service Management.
